

UCO DISPOSAL with mini Caddy (ACoRN System)

ALPHA biofuels

Changing Perceptions

miniCaddy

1. Stainless steel container
2. 50 Liters capacity
3. Washable
4. Rust Free
5. Clean and Hygienic
6. Handle high heat

Pour UCO into the miniCaddy

Pour used cooking oil (UCO) into the miniCaddy through the built in strainer.

Although the miniCaddy can withstand hot oil, for worker's safety, it is recommended to let the oil cool down before disposal

2 Type Of UCO Containers

Standard Alpha Biofuels UCO containers

(Cleaned and issued every time a collection is made)

Empty Bello oil container that can be recycled to contain the used cooking oils

(ensure that there are no holes or breakage on the container before use)

Transfer UCO into Jerry Cans

When the miniCaddy is full, transfer the UCO into the blue or recycled (yellow) plastic container

Attached Collection ID tag
(if you re using a recycled plastic container - yellow)

- Ensure that the there is no breakage or holes to the container (to prevent pest)
- Stored the containers in a cool dry place

Dispose sludge

Sludge collected on the strainer can be disposed as food waste or general trash.

- Please clear debris regularly to prevent pest

Request for service

When you have 4 or more full jerry cans, please scan the QR code with your smart phone to request for collection.

For Smaller quantities of UCO

if the amount of UCO disposed is less than 10 litres per change, you can pour the (cooled down) UCO directly into the jerry cans using a funnel. (Ensure no debris enter the container)

During collection of UCO Staff Verification
